(*) Please note that any small differences between the Overall Score and the added total of Measurement Theme scores are due to rounding the numbers at different stages of the score calculation process.

Please note also that the "Not met" labels in the Explanation boxes below do not necessarily mean that the company does not meet the requirements as they are described in the bullet point short text. Rather, it means that the analysts could not find information *in public sources* that met the requirements *as described in full* in the CHRB 2018 Methodology document. For example, a "Not met" under "General HRs Commitment", which is the first bullet point for indicator A.1.1, does not necessarily mean that the company does not have a general commitment to human rights. Rather, it means that the CHRB could not identify a public statement of policy in which the company commits to respecting human rights.

To the maximum extent permitted by law any responsibility or liability for the Benchmark or any related material is expressly disclaimed provided that nothing in this disclaimer shall exclude any liability for, or any remedy in respect of, fraud or fraudulent misrepresentation. Any disputes, claims or proceedings this in connection with or arising in relation to this Benchmark will be governed by and construed in accordance with English law and submitted to the exclusive jurisdiction of the courts of England and Wales.

As CHRB Ltd, we want to emphasise that the results will always be a proxy for good human rights management, and not an absolute measure of performance. This is because there are no fundamental units of measurement for human rights. Human rights assessments are therefore necessarily more subjective than objective. The Benchmark also captures only a snap shot in time. We therefore want to encourage companies, investors, civil society and governments to look at the broad performance bands that companies are ranked within rather than their precise score because, as with all measurements, there is a reasonably wide margin of error possible in interpretation. We also want to encourage a greater analytical focus on how scores improve over time rather than upon how a company compares to other companies in the same industry today. The spirit of the exercise is to promote continual improvement via an open assessment process and a common understanding of the importance of the UN Guiding Principles on Business and Human Rights.
