Company recommendations:

**Targets:** The company requires targets which hold management to account for long-term emissions reductions and further interim targets to incentivise near-term action on long-term goals.

**Emissions reductions and reporting:** The company’s activity and emissions reporting does not provide sufficient detail to give a full view of its decarbonisation progress and plans. Improved disclosure will allow for this assessment.

**Transition plan:** The company can improve the elements of its transition plan by ensuring it includes long-term targets and financial commitments. The plan should be regularly reviewed to ensure its ambition is sufficient for a 1.5°C pathway.
