Company recommendations:

**Targets:** The company requires targets which are comprehensive enough to hold management to account for short, medium and long-term action to reduce emissions.

**Emissions reductions and reporting:** The company’s activity and emissions reporting does not provide sufficient detail to give a full view of its decarbonisation progress and plans. Improved disclosure will allow for this assessment.

**Low-carbon CapEx:** The company’s CapEx reporting does not provide sufficient detail to show its financial commitment to climate mitigation. Improved disclosure will allow for this assessment.

**Transition plan:** The company should establish a time-bound action plan that outlines how it will transition to a low-carbon economy. This should include medium and long-term targets, verifiable and quantifiable key performance indicators and financial commitments. The plan should be informed by scenario analysis to ensure that the plan’s ambition is sufficient for a 1.5°C pathway.
