ACT Score (2021)

#25_{/50}

Sector Rank (2021)

Company recommendations:

Targets: The company has set a long-term decarbonisation target. However, it has not set sufficient intermediate targets. Setting regularly spaced intermediate targets will incentivise near-term actions on its longer-term goals.

Emissions reductions and reporting: The company's emissions contrast with its 1.5°C pathway which requires it to make substantial decreases in its emissions intensity.

Transition plan: The company can improve the elements of its transition plan by ensuring it includes medium and long-term targets, verifiable and quantifiable key performance indicators and financial commitments. The plan should be informed by scenario analysis to ensure that the plan's ambition is sufficient for a 1.5°C pathway.
