Company recommendations:

**Targets:** The company has set comprehensive targets that cover the short, medium and long term. To be effective the company should be clear on the use of offsets and prioritise direct emissions reduction where possible.

**Emissions reductions and reporting:** The company’s emissions intensity trend contrasts with its 1.5°C pathway which requires it to make substantial decreases in its emissions intensity.

**Low-carbon CapEx:** To align with a 1.5°C scenario the company should significantly increase the proportion of its total CapEx spend invested in low-carbon and carbon removal technologies.

**Transition plan:** The company has a comprehensive low-carbon transition plan informed by climate scenario analysis that has considered the implications of a 1.5°C scenario. It should continue to monitor progress against its plan and make adjustments to remain aligned with a 1.5°C pathway.
